You are welcome to come to ANY of us for help at the scheduled times. Just drop in - no appointment necessary. Be sure you have attempted the problems so we can build on what you know. We have found that is the best way for students to learn. Simply giving you a numerical answer if you have not really tried to do the homework is not an effective approach, and we won't do that.

When are we available? If these times don't work for you, call or email me to set up something else.
