Overview and Course Content

This course is designed to assist students in understanding organizational behavior and organizing processes by presenting knowledge and experiences from the organization sciences discipline. The purpose of the course is to increase individual effectiveness managing the day-to-day issues in the lives of managers and administrators. Individual, group, intergroup, organizational behavior, and their interaction with one another will provide the general course topics. Emphasis will be placed on helping students to be better prepared to face the realities of organizational life. Special attention will be given to developing practical managerial and organizational skills, understanding organizational processes, expanding self-awareness, developing group diagnostic skills, and increasing effective leader behaviors. These skills will be developed through class exercises and simulations, individual readings, case analysis, group exercises/projects, etc.

Course Objectives

The general objectives for this course are threefold. First, the class should help you in the mastery of course material so that you can competently discuss issues of organizational behavior. Second, the class will develop your skill in applying course concepts to organizations in which you are a member. And the third general objective of this course is to create a forum for personal introspection. Class activities will push you to examine your organizing and life assumptions that you seldom think about and that many of us are unaware. Course material may suggest new views that could be utilized to design organizations and how these different assumptions may create new organizational forms as well as very different experiences for members of these groups. Upon completion of this course, you should be able to discuss conceptually (and through the use of appropriate organizational examples) such issues as organizational structure, goals, conflict, politics, power, work design and motivation, the organization as an open system,
organizational effectiveness, alternative organizational forms, organizational communication, leadership and decision-making, and the management of change.

Course Activities

We start with the assumption that the learning process is highly complex. Different methods of learning work better for different people, and different methods are appropriate for the objectives set out above. The course will therefore involve a combination of the following methods: readings, lecture, case analyses, simulations, examinations, short writings, team presentations, etc.

It is also assumed that learning is not solely a one-way process; that is, from instructor to student. Individual comments, questions, discussions, and experiences should comprise a great deal of class time. Ultimately, responsibility for learning in this course rests with each individual. Individuals are encouraged to let their needs be known so that they can achieve conditions optimal to their learning.

Components of the Course

Learning Teams

The primary concept and structure around which this course is the use of teams and team learning. All class participants will be assigned to a learning team. The team will be a semi-autonomous structure in which you will engage in many of the course requirements. Fellow team members will help you to master course material and concepts, work with you on in-class exercises, listen to your analyses and applications, provide support and feedback to you, etc. The majority of the learning from this course will be generated through discussions and exercises with your learning team. You will need to develop strong working relationships with your team members so that you can teach and learn from each other. There are two major tasks that your learning team will perform: (1) prepare and ready all team members for a mid-course examination; and (2) conduct a semester long organizational excellence research project that your team will present to the class as well as provide a written report. More information on the organizational excellence exercise will be provided as the semester progresses.

Four major class activities are designed to assist your learning: in class activities and exercises; course readings/learnings and examinations; reflected best-self exercise, personal journal, and personal learnings paper; and team organizational excellence research.

In Class Activities and Exercises

Class sessions will be designed more like workshops than traditional class lectures. A typical class will involve you and your team in an experiential exercise, ask you to reflect on that experience with your team, and then help you identify useful concepts and ideas related to organizational practice. A major emphasis of these sessions will be increasing your self-insight as well as your managerial/interpersonal skills. In particular, one managerial skill that will be emphasized in the course will be how to create an effective team. You will need to be actively engaged in class in order to learn from these
classroom experiences.

**Course Readings/Understandings and Examinations**

All participants are personally responsible for reading class assignments, understanding the material, and demonstrating their knowledge/understanding of course material via an in-class mid-semester examination and a final take-home examination. The primary reading for the course will be the required Weisbord book; although from time to time there will be other class handouts and readings. I will also provide a CD with numerous references related to the topics of this class.

The learning team will also play a central role in developing your understanding of course material. The mid-term exam is structured so that you will write the exam individually. An additional reward (grading) structure will also be added that reflects the knowledge that rests in your team. You will receive an individual grade on your examination, but, in addition, you will also receive a team grade (the average examination score for individuals in your team). This reward structure is intended to create a cooperative team learning environment where you are not only concerned about your individual performance, but also the performance of other team members. This reward structure encourages you and your team members to engage in activities that help your team perform at a high level. This structure simulates organizational designs that manage performance by creating a concern for both individual and team performance. To achieve the highest team score you will need to teach others, learn from them, and create the necessary cooperative team environment in which you and your team can excel.

The final take-home exam will be structured solely as an individual activity and will be due the last day of class.

**Reflected Best-Self Exercise, Personal Journal, and Personal Learnings Paper**

All class participants will also engage in three research/writing activities of a personal nature:

**Reflected Best-Self Exercise.** Each individual will collect data on their best-self, analyze this information, write a reflected best-self portrait, and hand in a written report on these activities. The assignment is due (date to be decided). A handout is provided with further details.

**Personal Journal:** To facilitate your learning and the application of course concepts, a personal journal will be required of each individual. Effective managers have keen abilities to reflect on and think about their experiences in a manner that helps them make sense of what has happened. This reflection extends one’s view and creates a more complicated understanding of organizational life. Research has shown this to be a key in effective personal behavior. Every week you will be required to write a journal entry that
reflects on your experiences in this class, the experiences you have had at work, or some combination of this. The entry does not have to be long -- about a page will do. Some weeks you might decide to reflect on and write about your learning team and the dynamics that exist, another week you might want to reflect on your boss or a co-worker or a subordinate and apply what you are learning in class to that situation, or you might see implications for writing about your family or experiences in a social or religious group. You are required to submit your personal journal weekly. It is required that your journal be dated and submitted electronically in Microsoft Word format. Your weekly journal entry should be submitted to charles_r_wright@hotmail.com (please note the there are underlines ( _ ) in the spaces in the email address). This should be submitted prior to attending the class session on Wednesdays. Be sure to have your name, date, team number, and class (Mgt. 503) clearly displayed on your journal entry.

Personal Learnings Paper: Each individual will write a concise paper documenting what they have learned about organizational behavior and themselves from participating in this course. In this paper you will also need to access your skills as a productive team member. More specifics on this assignment will be given as the semester proceeds. This assignment will be due the last day of class.

Team Organizational Excellence Research

As mentioned above, a semester long project will involve your team in conducting research on organizational excellence. Your team will select an organization to study (from a list provided), research this company, assess and determine the basis and reason for its excellence, develop a rich case study that will be presented to the class and written up in a report, propose a detailed model of organizational excellence, and identify your learnings. A more detailed handout on this project will be provided in the near future.

Evaluation and Grading

Grading components (percentage)

Mid-Course Individual Exam (10 percent)
Mid-Course Team Exam (10 percent)
Final Individual Exam (15 percent)
Reflected Best-Self Report (5 percent)
Personal Journal (5 percent)
Personal Learnings Paper (5 percent)
Team Organizational Excellence Report (50 percent)

Although individual contributions to class sessions will not formally be assigned a grade, the instructor reserves the right to raise or lower any participant’s grade based on in-class attendance and participation.

Class Assignments and Readings

All class readings and assignments will generally follow the attached outline. However, based upon our progress we may deviate from this schedule should it be deemed necessary. All reading assignments (except the textbook) will either be handed out in
class or located on a CD you will be given.
Some Thoughts on the Course

The course is designed for those individuals who are or aspire to be members of formal organizations, especially those in managerial positions. The goal is to help you as a manager to more fully utilize the resources of any group or organization with which you are working.

This course will demand a fair amount of work from you! My expectations are very high. You will be challenged to discuss your beliefs and values in the context of organizational situations and to appreciate sufficient levels of complexity that are not easily understood with the limitations of ordinary human cognitive processes. You will lose points with me if you miss class or fail to actively engage in discussions. You will not lose points for contributing half-baked ideas, asking philosophical questions, or challenging teaching approaches.

The style of teaching in this course may be significantly different from what you’ve experienced in other courses. Much of my time will involve designing processes and structures in which this class can successfully accomplish learning objectives. I will provide the structure through a sequence of activities that will expose you and your classmates to particular organizational dynamics or intellectual inquiries. These activities include discussions, lectures, questions and answers, and exercises that place the lessons to be learned in context. As an instructor I have the responsibility for controlling the rate and degree of conceptual input through assigned readings, lectures, and interventions. In addition, it is my role to model leadership and, as a part of the learning process in the course, may (or may not) chose to share my thinking processes. I may lecture a little, but most of our time I will try to facilitate your learning the discover of new insights.

All students are expected to attend all class meetings and to come prepared to fully participate in the activities that have been scheduled. Preparation includes reading and writing assignments in advance with enough depth and concentration so you can develop the background and concepts needed in order to contribute effectively. Since the medium of learning in this course is interaction, you are expected to participate actively in all events and to attempt to influence others as well as to allow yourself to be influenced. As a student you are expected to challenge the instructors as well as peers when there are differences of opinion, and to ask for clarification and explanation when necessary. Students are expected to recognize the resources in the class and to ask for help from those who can give it. If unavoidable absences occur, you are expected to take steps to see that activities planned for the date of the absence can be carried out as scheduled. This may require notification to the people concerned and affected, substitution by other persons, or other measures as appropriate.
Tentative Class Schedule  
MGT 503, Organizational Behavior and Management Processes  
Wednesdays, 6-8pm, Guthrie 201

1. August 30: Class Topic: Introductions, Course Overview, and Getting Started/Socialization

2. September 6: Class Topic: Understanding High Commitment High Performance Work Teams  
Reading Topic: Taylor and Scientific Management  
Weisbord: Intro. – Chpt. 3 (pp. xvii-73)  
“The Social Contract Between Teacher and Student” (HO)

Reading Topic: Lewin, McGregor, and the Learning Organization  
Weisbord: Chpt. 4-7 (pp. 75-150)  
“Teaching Smart People How to Learn” (HO)  
“The Leaders New Work” (HO)  
Group 1 Presentation

4. September 20: Class Topic: Decision Making  
Reading Topic: Emery, Trist and Open Systems  
Weisbord: Chpt. 8-9 (pp. 151-192)  
Group 2 Presentation

Reading Topic: Action Research (Theory into Practice/Practice into Theory)  
Weisbord: Chpt. 10-11 (pp.193-246)  
“Conflict: An Important Dimension in Successful Management Teams” (HO)  
Group 3 Presentation

6. October 4: Class Topic: Choosing a Leadership Style
7. October 11: Class Topic: Understanding and Dealing With Difficult People
Reading Topic: Managing and Consulting in the 21st Century
Weisbord: Part 3 – Chpt. 17 (pp. 319-365)
Group 5 Presentation

8. October 18: Class Topic: Midterm Exam

9. October 25: Class Topic: Designing Sociotechnical Systems
Reading Topic: Transforming Teamwork
Weisbord: Chpt. 18-19 (pp. 367-426)
“Designing Socio-Technical Systems” (HO)
Group 6 Presentation

10. November 1: Class Topic: Organizing Whole Systems Change
Reading Topic: Future Search
Weisbord: Chpt. 20-21 (pp. 427-456)
“Methods, Values, and Assumptions Underlying Large Group Interventions Intended to Change Whole Systems” (HO)
Group 7 Presentation

11. November 8: Class Topic: Individual Values and Organizational Decisions
Reading Topic: Conclusion of Weisbord Book
Weisbord: Chpt. 22 – Epilogue (457-485)

12. November 15: Class Topic: Two Unique Organizational Forms: Mondragon and SAS Institute
Reading Topic: “Learning from the Mondragon Cooperative Experience” (HO)
Take home exam given
   Reading Topic: “Negotiating Rationally” (HO)

14. December 6: Class Topic: Power and Influence
   Reading Topic: No Reading

15. December 13: Class Topic: Final Session Summary and Closure
   Take Home Exam Due
